

What is it for?

Everyone will agree that a good sexual relationship is the foundation for a happy life.

Yet it seems to be the way of the world that men often reach climax more quickly than women. This is not generally a medical problem - there are many reasons for over-rapid ejaculation. After all, the human species would never have been able to evolve if our ancient predecessors hadn't been able to sow their seed quickly! Nonetheless, over-rapid ejaculation may leave a woman feeling like she's missing out on all the fun and put an unnecessary strain on your love life. Luckily, help is at hand in the form of **STUD 100® Desensitizing Spray for Men**.

STUD 100® helps in cases of over-rapid or premature ejaculation by prolonging the time it takes a man to reach climax, giving you both a chance to enjoy making love - instead of worrying about it being over too soon!

With **STUD 100®** you can say goodbye to your anxieties and concentrate on satisfying each other more fully than ever before.

What does **STUD 100®** do?

- 4 Gives added staying power to men

You can improve your sexual confidence with **STUD 100®**

The delay spray for men that prolongs sexual pleasure for men AND women

What is it?

STUD 100 is the world's leading brand of desensitizing sprays for men in more than 60 countries around the world.

STUD 100 has as its active ingredient Lidocaine, a well-known anaesthetic. It delays ejaculation by reducing the sensitivity of the penis. It is a licensed

Any questions?

We have 30 years' experience in helping couples achieve greater sexual satisfaction. Not surprisingly, we've answered a few questions in our time. Here are some of the most frequently asked questions:

Q. Does STUD 100 really work?

A. It certainly does. But you don't have to take our word for it. Strictly controlled clinical trials and surveys prove that STUD 100 delays ejaculation. That means, quite simply, greater enjoyment for both men and women.

Q. How do I use it?

A. Simply spray it on the head and shaft of the penis, normally between 5 and 15 minutes before intercourse to allow time for absorption to take place. Use the minimum effective number of sprays, which will vary from 3 to 8 depending upon the individual. Each can contains 120+ metered dose sprays. Do not use more than 24 spray doses in 24 hours.

Q. Can I use STUD 100 with a condom?

A. Yes. STUD 100 has been tested with a leading brand of latex condom and meets the BSI Test Protocol.

Q. Can I use STUD 100 during oral sex?

Yes. Simply apply well in advance and use the minimum number of metered sprays necessary.

Q. What's the difference between STUD 100 and Viagra?

A. Both help enhance your sexual experience, but in different ways. Viagra stimulates erection whereas STUD 100 will help to make sure sexual

intercourse isn't over before it's begun.

Q. Are there any side effects?

A. None at all, provided you follow the instructions. Do not use STUD 100 during pregnancy or if either of you is allergic to local anaesthetics. Do not apply it to broken or inflamed skin. Should any rash or irritation occur, discontinue use and seek the advice or your doctor. Other than that, anything goes!

Q. And what about the environment?

A. No side effects there, either! STUD 100 uses a pump-action spray which does not harm the
